News in Glove Colors

By MARY BARRETT, Women's Editor

Gloves are attaining a new popularity this season, and understandably so. With gloves in so many new interesting textures and high colors, the new lineup tempts us to use them to accessorize our most casual clothes.
With tweeds occupying top billing for basic wardrobes this year, black or white pigskins, high color velveteens, and the ever-popular chamamois-colored doeskins, will give complimentary accents to tweeds. The shorties in leather or knit are always good here, too.

New Shades
All of the luscious new fall fabrics inspire coordination with softer-toned suede and capeskin leather gloves which are often matched with shoes or bags. A sea-foam kid glove can be matched this year with a handbag and a sandal for a pale reflection to other greens.
Accent the plush burnt orange or gold-toned woolens with fern green gloves, perhaps a green bag, and ropes of fake-jade necklace. The same green accessories may be worn with lemon yellow, green-flecked tweeds, your rust browns, and beloved beiges.

One-Color Effects
Pale or powder blue gloves are a love to fuse with the new flame blues that are being shown in so many of the new suits and coats. A matching pale blue sweater under the deeper-toned blue suit would add further interesting one-color effect. Your pale blue gloves will also compliment your purple clothes, also stressing the mixed blues.
Elegant Evening Gloves
Elegance has returned to the evening scene with shoulder-length gloves of all shades from the traditional creamy kid to bright colors in either leather or fabric to blend or contrast with the gown.
